

Scrapbooking with PSE 7

Welcome

I'm sure that you've been using PSE in correcting photos for printing (weather you do it yourself or have them printed).

1. Open PSE 7 and get ready for fun! Click on the edit tab
2. Open the photos you want to use.
3. Learn about layers
4. Make custom mat
5. Other special shapes (explore)
6. Make a stamp. Stamps are fun elements to use in designs.
(shapes picker>Objects>Black Stamp shape>hold shift key to restrain proportions, add a drop shadow, hit style settings)
7. Shadows, drop Shadows, artistic effects (pull on to working page, or onto layer)
8. Frames (create>Photo Book)
9. Shortcuts

Check for the file hand-outs from the Aug 17 SIG. There is one on Shortcuts.
